SOLUTIONS

eLogger Electronic Logbook software replaces paper log books and disconnected systems – collecting, storing, and distributing real-time data about your operations to those who need to know. Millions of entries have been made by thousands of users in facilities worldwide. Electronic logbook software solution contributes to the safety, compliance, efficiency, and best-business practices of the biggest names in dozens of industries.

SCADA

As a Service Oriented Architecture the COMPLETE SCADA Service can connect data from SCADA Servers, SCADA Clients, Visual Studio Applications, Microsoft Excel, and databases. Use your LAN or Internet for easy remote connectivity. All components are 100% managed.

Plug into the power of the first smart client SCADA solution! Complete SCADA Share data with OPC Servers, OPC Clients, .NET applications, SQL Server, Oracle, Access, and MySQL using your LAN, WAN, and the Internet. Create HMI applications using Visual Studio or Expression Blend with no programming required for WinForm, Web, and WPF solutions.

Environment Monitoring Solution

Environment Monitoring Solution consists of a flexible set of software applications to effectively manage your organization's environmental data and processes. Easily manage, track and report all of your environmental metrics in real-time, streamline incident reporting and drive continuous improvement across your organization with this user-friendly software system.

Industrial Monitoring Solution

We offer a comprehensive range of services including Industrial video monitoring , Thermal imaging and thermographic monitoring systems, Scanning laser monitoring technologies, Video analytic and intelligent control systems, Security systems including video surveillance, access control and perimeter detection, IP networking solutions including fibre optic and wireless systems , System design, engineering, drafting and estimates , Product sales and pre-delivery assembly System installation, commissioning and training, Maintenance programmes and on site repairs, Project management and complete turn-key systems.

Shoplogix is the leading developer of manufacturing performance management solutions designed to enable manufacturers to reduce operating costs, increase manufacturing profitability and drive rapid time to value.

Shoplogix patented Plantnode® solution is the market's only integrated technology solution, combining the power of software analytics with the strength and stability of embedded technology.

TOMMS provides end-to-end CMMS solutions within an integrated Enterprise Asset Management (EAM) framework. Our Computerized Maintenance Management System were develop from the reality that maintenance processes and MRO inventory management are directly linked to the revenue.

eDocument Controller

Document Management system enables companies to manage their documents such as tenders, designs, proposals, manuals, reports, correspondence etc in a soft copy format which can later be used to search any type of stored documents.

Electronic documents can be shared with clients, colleagues, etc. You can give restricted access to some, and more to other. Special permissions such as deleting, printing and others can be given or not to different users.

- Main Features of Document Management System are:
- Access your files wherever you're located geographically.
- Spend less time dealing with requests for files & other resources.
- Find files faster on a centralized web base application or web site.
- Easily and quickly search for the exact file you need because our digital image archiving software ensures all files are accurately categorized with details.
- Send Forward document like e mail
- Version Controlling of documents
- Online Submission of Document Request.

DockMaster is a fully integrated software solution designed to manage all departments and functions within a marine facility including accounting, marina management, boat sales, work order processing, inventory control, point-of-sale, and a host of other areas.

DockMaster has been serving the Marine Industry Since 1984 and is a Global Leader in Marine Management Systems for Boat Yards.

eConstruction Management

Successful contractors have a reputation for delivering projects on time and on budget. Contractors who invest in information technology are executing projects more efficiently, delivering a higher quality product, and improving employee satisfaction.

Fax4Office Solution

Fax4Office is a personal fax-integrating program that creates facsimile messages from documents and pictures, sends, receives and manages them, adding cover pages, directly from Windows, Internet Explorer and Microsoft Office programs. You can send any Word, Excel or Webpage document directly from Internet Explorer or Microsoft Outlook, without previously printing it. All your sent and received faxes will be stored in Microsoft Outlook and open, reply or forward them to other fax and e-mail recipients like regular e-mail

Inventory/Purchasing Management

e-BEAMS is equipped with a powerful Inventory & Storeroom, Purchasing and Receiving system. These three modules are fully integrated and provide the user with unparalleled flexibility and functionality.

LaserNet

LaserNet is a suite of document and output management solutions. Each element tightly integrates with your existing IT applications to support the migration from labor and paper intensive systems to cost effective, faster e-enabled document processing. LaserNet captures output and transforms it into attractive documents, reports and labels, intelligently routing them for distributed print or electronic delivery by e-mail, fax, PDF, XML etc. to customers and business partners:

Master Clock

Master clock provides complete solutions for this vital need for thousands of satisfied customers worldwide. We manufacture high quality, cost-effective master clock and precise time solutions for clocks, computers, network and other devices.
